

• Takeovers

At **alarm smiths** we also offer to take over the maintenance on your existing system. Maybe you're fed up with your current supplier or just fancy using a more local company. We will come and do a site visit and in the unlikely event that any work be needed to bring your system up to our standards, we will happily quote to do that for you.

• Aftercare

Once installed, **alarm smiths** will offer to maintain your system on a regular basis and for peace of mind this comes with 24 hour callout cover just in case you need us. We will be there night and day to answer your call or come out to your premises.

● About us

alarm smiths is a newly established family run security installation company with over 10 years experience for both home and workplace environments.

Based in St Neots, we are ideally situated to offer our services to locations such as Cambridge, Peterborough, Bedford and surrounding areas.

It is our aim to provide you with an affordable and reliable alarm system using quality equipment incorporating some of the latest technology. We are also able to offer CCTV and Door Entry systems.

● What makes us different

Being a smaller company we offer a more personal approach. We want our customers to feel comfortable with the company providing security for their belongings and premises.

We are able to offer the friendly and professional service that is sometimes lost with larger companies.

● Installation

Our quality of workmanship is second to none and we take great care to ensure your premises are left clean and tidy after your installation and we do our utmost to conceal as much cabling as we can.

Our bell boxes are designed to be discreet but clearly display the name of a professional security company while our detectors are designed to be as small as possible.

Many new built homes nowadays come with cabling for an alarm already in place. Why not take advantage of this as there is a big saving to be made, or maybe you would prefer a wireless system?
